TfR1 · 200-design broad screen · predictions, not validated binding
One refolding sample per sequence
apical short
conserved short
apical long
conserved long
apical nanobody
Contact-pair PAE (Å)
Interface ipTM
Screening outcomes
Geometry eligible
Also ipTM ≥0.50*
Design count (40 per arm)
apical short
conserved short
apical long
conserved long
apical nanobody
Generated-reference consistency
Interface Cα RMSD in receptor frame (Å)
Binder self-fit Cα RMSD (Å)
Circle outlines: geometry eligible. Stars: published positive; crosses: presumed negatives. *Nanobody confidence threshold is descriptive.
