short_015 shares a known backbone arrangement

Seed 1409 · TM-align RMSD 1.45 Å
TM (design / known chain): 0.858 / 0.709

Seed 1511 · TM-align RMSD 1.47 Å
TM (design / known chain): 0.858 / 0.710

Known protein AF1782 (2OO2 A) short_015 design

All 61 design residues align; 61/76 modeled AF1782 residues. Global sequence identity: 27.6%.
Cα traces, binder-only TM-align. Structural similarity does not establish copied sequence or binding function.
